

Ortus

This is my password manager. It does not in any way store master passwords. Generated passwords are encrypted.

Done:

- Cross-platform application
- Users system
- Password managing
- All user data is stored encrypted

TODO:

- Web interface
- Automatic updates
- Cloud data storage
- Clean mode - not saving any data

Installation

1. Clone or download Ortus

2. if noob:

Install [Python 3](#). **!!! Select "add python to path" option when installing !!!**

if not noob:

pass

3. if noob:

run scripts/install.py

if not noob:

pip install cryptography PyQt5

4. Done!

Usage

Run scripts/OrtusApp.py
